EXPERTISE

- web Development
- Django
- Linux
- Javascript
- Docker
- Python

LANGUAGE

- English (basic)
- Español (native)

WORK EXPERIENCE

I have no work experience at the moment but have done projects on my own.
but I also had experience managing a bakery-restaurant which gave me confidence, values and many managerial and leadership lessons as well as humility and patience.

-web page with django

I learned how to model the profile using django's built-in classes, how to structure a project, understand what an orm is and the capabilities and facilities it has to build a website.

-Qrgenerator django

i built a web site to generate qrs by profile also in the research i saw how the qr code works and where it comes from. i was fascinated to see how it works and the problem it solved.

-UI

in my path I have wanted to make desktop and web GUIs and I have done several projects that I did not complete due to personal issues (a long story) but they have taught me a lot about how to develop them and the logic they require.

-Linux

this has been an enriching experience both for the knowledge and the help that these systems generated in me, learning it was necessary and useful and I have installed many and made ethical hackin with this one since it is a jovit and I am fascinated by this system in which I spend my time testing or customizing it.

EDUCATION

Platzi Django Course
Course Django
2024-2024

Platzi Django Rest Framewor
creation of apis
2024-2024

Platzi Docker
Docker fundamentals
2024-2024

Fe y alegria
Medium technician in administrative services, mention in computer science
2008-2015

I am studying systems engineering at the National Open University.
